

Comprehensive Campus Security Camera & Door Access Upgrades

Philadelphia, PA

Client: Non-Public Schools

Project Description:

This project involved a comprehensive upgrade to the school's physical security infrastructure, focused on strengthening campus safety, improving visibility, and reducing unauthorized access risks.

The completed project delivers expanded real-time monitoring capabilities, improved situational awareness, and stronger perimeter protection—providing this Philadelphia High School with a modernized, scalable security solution designed to support a safer learning environment.

Services Provided:

- Upgraded the school's surveillance system with new Hanwha 5MP dome cameras and multi-sensor, multi-directional IP cameras for expanded interior and exterior coverage.
- Provided and installed mounting hardware, conduit, fittings, and CAT6 plenum cabling to support the new camera infrastructure.
- Configured and integrated cameras with the Hanwha WAVE video management system, including 24-channel licensing and NVR setup.
- Installed 16 Detex door prop alarms with mortise cylinders and keyed access to improve entry-point security.
