

Integrated Video Surveillance & Access Control System

Philadelphia, PA

Client: Non-Public School

Project Description:

Under the Pennsylvania Targeted School Safety Grants for Nonpublic School Programs, Admiral Integration successfully completed an integrated video surveillance and access controls upgrade for this Catholic School in Philadelphia, PA.

This project involves the design, installation, and configuration of a comprehensive security solution combining advanced video surveillance and electronic access control systems. The objective is to enhance overall facility safety, improve visibility, and provide centralized monitoring and control.

Services Provided:

- Site assessment, system design, and installation of structured cabling, conduit, network switching, and supporting infrastructure.
- Installation and configuration of 32 IP cameras, NVR setup, video storage configuration, and remote monitoring capabilities.
- Installation and integration of door controllers, card readers, intercom system, magnetic locks, and access management software.
- Full system setup, integration of all components, testing, user configuration, and final operational verification
