

Network Infrastructure, POS & Digital Display Installation

Easton, PA

Client: Regal Cinemas

Project Description:

Admiral Integration partnered with Regal Cinema to design, install, and validate a robust, high-performance network and digital display infrastructure supporting point-of-sale (POS) systems, digital media players, and operational technology throughout the facility. The project focused on reliability, organization, scalability, and minimal disruption to theater operations.

Services Provided:

- Structured Cabling & Network Infrastructure:
 - Installation and termination of 87 CAT6 network drops
 - Deployment of multiple CAT6 patch panels (24-port and 48-port)
- POS & Device Connectivity:
 - Network setup and connectivity for POS systems
 - End-to-end testing to ensure consistent performance across all POS locations
- Digital Media & Display Installation
- Testing, Quality Assurance & Cleanup
