

## Security Systems Maintenance & Support

Philadelphia, PA

**Client: Delaware Valley Veterans Home**

### Project Description:

Admiral Integration was selected to provide comprehensive preventative maintenance, inspection, and on-call support services for the Delaware Valley Veterans Home's (DVVH) critical security infrastructure.

The project supports the ongoing reliability, compliance, and performance of the facility's access control and video surveillance systems, helping to ensure a safe environment for residents, staff, and visitors.

Through proactive maintenance and responsive support services, Admiral Integration helps DVVH maximize the uptime, effectiveness, and longevity of its security infrastructure.

### Services Provided:

- Preventative maintenance inspections of the facility's security systems
- On-call maintenance and repair services with rapid response requirements
- System testing, diagnostics, and performance verification
- Compliance with applicable life safety, NFPA, Department of Health, Veterans Administration, and local code requirements
- Original manufacturer-approved replacement parts and repairs
- Detailed service documentation and reporting
