

## School Security Upgrade Project

Philadelphia, PA

Client: St. Laurentius School

### Project Description:

Admiral Integration completed a comprehensive security enhancement project at St. Laurentius School, improving campus safety through the installation of a new video surveillance system and electronic access control solution. The project was designed to provide enhanced visibility, controlled entry points, and centralized security management for school administrators.

Project was Phase 2 of a two-phase campus security modernization initiative.

### Services Provided:

- Installed 6 high-definition AI-enabled surveillance cameras throughout the facility.
- Provided new CAT6 cabling infrastructure to support all camera locations.
- Configured cameras for continuous monitoring with hybrid color imaging technology and scene-adaptive WDR for improved image quality in varying lighting conditions.
- Completed system programming, testing, and commissioning.
